Keeping track of your health

Record your signs and symptoms of aHUS, and your lab results, for your next doctor's visit.

As you know, atypical Hemolytic Uremic Syndrome (aHUS) is a serious, genetic, lifelong disease. Regularly tracking your overall health, as well as the results from your doctors' visits, can help you and your healthcare team get a better sense of how well your aHUS is being managed.

This diary will help you track how you're feeling, monitor any signs and symptoms of aHUS, and house some of your lab results.

Let's begin here.

Work with your doctor to complete the following important background information. This information will help provide valuable insight into your health history so your healthcare team can provide the best care possible.

Date of birth:	Age at diagnosis:		Date of confirmed aHUS diagnosis:			
Atypical HUS Histor History of TMAs?	r y: ⁄es No					
If yes: How many TMAs	did you experience pric	or to y	our diagnosis?			
When did these occur?			At what age?			
Additional Notes (ie. What triggered your aHUS: infection, surgery, pregnancy, etc. ?)						
Family history of TMAs Which relative(s)?	or aHUS?	Yes	Νο			
Additional Notes:						

TMA, thrombotic microangiopathy

Keeping track of your health

Identified genetic m	utation?	Yes	No		
Family member(s) wit	tic mutatio	on?	Yes	No	
Which relative has a genetic mutation?					
Additional Notes:					
Renal insufficiency?	Yes	No			
On Dialysis? Yes	No				
Kidney transplant?	Yes	No		Dat	e of transplant:
Additional Notes:					

How is your aHUS currently being managed/treated?

Quality of life: Has your health affected any daily activities like:

Sleep?		Please Explain		
Yes	No			
Concentration?		Please Explain		
Yes	No			
Work or school?		Please Explain		
Yes	No			
Being active (e.g., playing sports)?		Please Explain		
Yes	No			
Other:				

Using your symptom tracker to discuss your health with your healthcare team

How to use this tool:

Record all the signs and symptoms you may be experiencing between each doctor's appointments by using the symptom monitoring form.

Bring your Symptom Tracker to your next doctor's appointment.

Review signs and symptoms with your healthcare team.

Track the lab results you receive at your doctor's appointments.

Topics you may want to discuss with your healthcare team.

To help you start a discussion with your healthcare team, here are a few suggested topics:

- How treatment can help manage aHUS
- Frequency and importance of regular doctor's visits
- Signs and symptoms of aHUS that should be brought to your healthcare team's attention

Important facts about aHUS

- aHUS is a serious, genetic disease that requires lifelong care
- The risk of aHUS may include complications related to the brain, heart, kidneys, lungs, blood, and digestive system

Speak with your healthcare team about important lab test results.

Monitoring your signs and symptoms

Record your signs and symptoms of aHUS and discuss them with your healthcare team

	Today's Date:	Today's Date:	Today's Date:		
	Date of my last visit:	Date of my last visit:	Date of my last visit:		
Signs and Symptoms	Once/ Never Daily Weekly Month N/A	Once / Never Daily Weekly Month N/A	Once / Never Daily Weekly Month N/A		
Confusion					
Seizure					
Headache					
Inability to concentrate
